PROJECTS

Home Automation(Savior) (07/2017 – 12/2017)
- This project is build using Raspberry Pi with website as interface enables the residents of the home to control the home appliances from anywhere and anytime using their smartphones, making their life easier as well as helps in conserving energy. It also includes features like live monitoring of your house and controlling bulb with camera using IMAGE PROCESSING.

Probe Form (03/2018 – 06/2018)
- Created a single page application using NodeJS with modular coding structure. It was an online platform where a candidate can take an online test and Manager can see the records of the candidate and assign interviewer according to his results.

Feedback Tracker (01/2018 – 03/2018)
- Designed the GUI from scratch in HTML5, CSS3 while adopting industry standard practices like responsiveness and web accessibility. It was based on the collecting and managing feedbacks that you have sent or received from your colleagues.

Data Streaming & Manipulation (05/2016 – 07/2016)
- Created a channel between Twitter app and Hdfs through Flume and also created a website named salary manager and imported the database to hive for further manipulation using sqoop.

ReferTU (07/2015 – 12/2015)
- Designed a website using PHP which helps the students of the University to buy second hand products like books, drafters, workshop dresses, and lab coats from their seniors at low prices.
